### HOW TO USE:

1. Wet intimate area with clean water.
2. Apply a few drops to the penis head, groin and testicles.
3. Gently rub and circulate wash onto the skin and leave on for 25 to 45 seconds.
4. Rinse thoroughly with clean warm water.
5. Repeat if desired.

If you have an uncut or uncircumcised penis, you will need to gently pull back your foreskin (Picture 2), hold back your foreskin, and proceed with the following:

1. Wet the penis head with clean water.
2. Then, apply a few drops of the wash directly onto the “wet” penis head, lather and allow for the wash to clean the penis head.

Remember to allow the wash to stay on the skin for 25 to 45 seconds, then rinse with clean warm water. Repeat is desired. Note: You are recommended to massage your penis outward and stretching the penis shaft. This will help increase blood circulation to the penis shaft.
